7:12:46 to 7:16:04

Kris Tjenell, DWR Deputy Director

... Our belief and our initial approach for the next round of consistency determination discussions is that all of the supporting materials for both of the issues on remand do in fact exist in our record and we will be redoubling our effort to identify them and point that out to the Delta Stewardship Council and work with their staff in advance of the formal hearing process through their early consultation process that they offer and to go through the process once again.

We don't expect the project footprint to change at all during the course of this process.
