**Subject:** Submitting a comment on Item 3 at its meeting 1/23/2025  
**Date:** Thursday, January 16, 2025 12:09:41 PM

---

You don't often get email from rmp572@gmail.com. [Learn why this is important](#)

Is this the place where I can submit a written public comment to the Council? If so, please acknowledge receipt of the following:

I'm a Solano County resident and have lived close to the Suisun Bay for 57 years. I have attended DSC meetings and urged you to do your job ensuring adherence to the Delta Reform Act.

Please do not approve this DWR proposed Item 3, Geotechnical drilling. It is not consistent with the co-equal goals of both protecting and enhancing the delta's ecosystem and creating a more reliable water supply system in California. This Item is submitting "limited information about a small portion of the geotechnical work required to build the Tunnel," and therefore inadequately presents a fair and thorough representation of what's required.

I have seen your Council historically make the effort to be objective in reviewing DWR proposals. But it's clear to me that you are under pressure from many viewpoints that severely challenge the intent of the Delta Reform Act. Do not approve highly questionable plans like this Item that ignore its intent.

Please do not abandon the needs of our Delta communities.
